2. The writer is forwarding this material to you with the thought that you may wish to show it to [REDACTED]. [REDACTED] has supported JAFIL activities for a long time. It is interesting to note that the material is tasteless, odorless and capable of easily being concealed in any common liquid, hot or cold. It is, as you know, extremely powerful. One hundred grams or 100/1,000,000 of [REDACTED] would be a heavy dose and this amount in a crystalline form could easily rest on the head of a pin. Sufficient to say that the amount contained in the attached box would probably produce serious injury for periods of eight to fifteen hours and possibly longer for all security officials. [REDACTED] The writer, however, does not recommend feeding to the Christiana people. It is usually present at Christiana office parties.
